To Our Friends and Patrons.

Herewith we have the pleasure of handing you our
SEED AND ILLUSTRATED IMPLEMENT CATALOGUE *for the*
year 1881.

The Seeds which we now offer have been grown and selected with the greatest care, no expense or trouble having been spared to have them, as we always endeavor to, pure, choice and reliable.

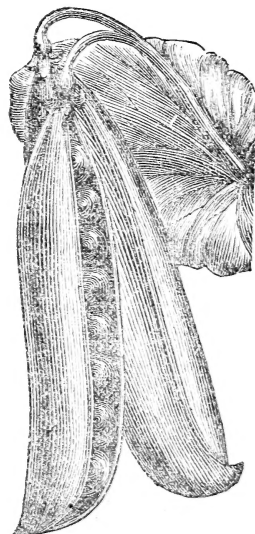

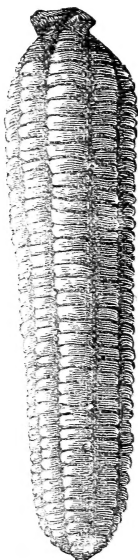

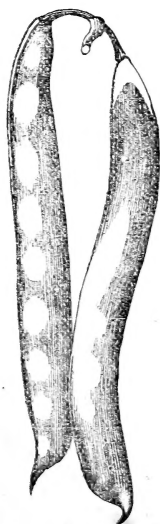

The past season has been very unfavorable for the production of seeds, and many varieties have proved almost a failure. Cabbage, Celery, Onion and Turnip seeds are exceedingly short crops, also the early and wrinkled varieties of Peas, and prices will, as the season advances, be much higher than the present quotations. We would advise our friends to send in their orders at as early a day as possible, so as to be sure of securing the full amount of the various seeds they may require.

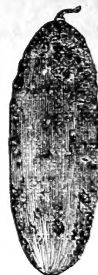

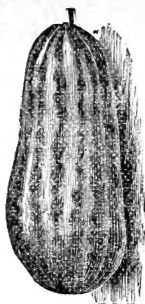

We shall always use our utmost endeavors to have all Seeds sold by us exactly as represented; yet, for the purpose of protecting ourselves against unscrupulous and designing persons, as well as the many circumstances on which the success of a crop depends, over which neither we nor the planter have any control,

We append the following resolution, unanimously adopted by ourselves and the principal Seedsmen of New York, Boston, Philadelphia and Albany:

“It is hereby mutually agreed between ourselves and the purchaser of our Seeds, that we do not warrant the same; and are not, in any respect, liable or responsible for the Seeds sold by us, or for any loss or damage arising from any failure thereof in any respect.”

VANDERBILT BROTHERS.

VANDERBILT BROTHERS,

No. 23 FULTON STREET, NEW YORK.

Annual Seed Catalogue.

Any variety of seeds not named in this catalogue will be furnished as low as any other reputable house.

Flower Seed Catalogues furnished on Application.

Persons desiring Seeds sent per Mail, will please enclose 16 cents per lb. in addition to price here named, to pre-pay the Postage. We always consult the interest of our customers, and frequently it is cheaper to send by Express than through the Mails; when no directions for shipment are given, we use our judgment for our customer's best interest. We do not guarantee safe arrival by mail. Peas and Beans weigh about two pounds to the quart.

Garden Seeds put up in papers of Five cents each, except when otherwise priced.

Prices are subject to variation.

ARTICHOKE,

SOLUBLE PACIFIC GUANO.

THE BEST MANURE IN USE.

IT IS PROMPT, ACTIVE AND RELIABLE, AND ITS VIRTUES SPEAK FOR THEMSELVES.

BELOW WE ATTACH A FEW OF THE MANY TESTIMONIALS RECEIVED :

BRIDGHAMPTON, L. I., December 29, 1880.

Messrs. VANDERBILT BROS.:

Dear Sirs,—As you requested, yet with some misgivings, I purchased of you, last spring, one ton of *Pacific Soluble Guano* as an experiment to be used in comparison with Peruvian Guano, Stockbridge, Phelps and Mapes' fertilizers for potatoes. The application was made in the drill and an equal amount of money value, as near as possible, of each was applied, and the comparison repeated in different parts of a twelve acre field, and upon different varieties of potatoes. The season was a dry one,—extremely so from May 15th until July 1st,—yet the yield was good in the case of each fertilizer. If better in one than another, I think I must give the palm to the *Pacific Soluble*.

I also applied it, at the rate of 250 pounds per acre, to one half of a three-acre patch of corn. The side on which it was applied had no other fertilizer, and, as compared with the portion not fertilized, would not have produced, I think, more than half a crop, as the other had been highly manured for corn and cabbage previously, and was in splendid condition for any crop. The corn was planted late in May, about the 23rd, and the dry weather I supposed would injure it seriously. The result, however, was a heavy crop, but decidedly best on that half fertilized with the *Pacific Soluble*. I had no idea that so small an amount of any fertilizer would produce such results, and must say that it is the best thing for its cost I ever used for corn. I applied it with a Grain Drill having a fertilizer attachment.

Respectfully yours,

ORLANDO HAND.

STAMFORD, CONN., January 3, 1881.

VANDERBILT BROS., New York:

Gents,—It is with pleasure I can recommend the *Soluble Pacific Guano*. That which I had of you last spring, I used on corn, and can safely say the crop was fully one-third larger than from any other manure I ever used. I shall want more this coming season.

Yours truly,

W. H. DIBBLE.

FLUSHING, January 6, 1881.

VANDERBILT BROS., New York:

Gents,—I purchased of you last spring *Soluble Pacific Guano*, which I used on early peas and beans, also on sweet corn—all for market use. I also used the same value of Peruvian Guano, and I considered one quite equal to the other. I can heartily recommend the *Pacific Soluble Guano* for early market crops, and it is an excellent forcing manure.

Truly yours,

ISAAC S. SMITH.

ROCKVILLE CENTRE, L. I., January 12th, 1881.

VANDERBILT BROS.:

Gents,—In reply to your inquiry about the *Soluble Guano*, I can say that it gave me entire satisfaction; raised 240 bushels of potatoes per acre; applied 1,000 pounds *Guano*; sowed half an acre of turnips; used about 300 pounds of your *Guano* and raised 150 bushels of good turnips. I also applied your manure to cabbage and got the best cabbage I ever raised.

Respectfully yours,

FR. SCHOEN.

MT. LEBANON, December 30, 1880.

MESSRS. VANDERBILT BROS.:

Dear Sirs,—The *Soluble Pacific Guano* that I had of you this season gave good satisfaction.

Truly yours,

LEVI SHAW.

HAUPPAUGE, L. I., December 30, 1880.

MESSRS. VANDERBILT BROS., 23 Fulton St., New York:

Gentlemen,—Yours of the 27th inst. duly received and contents noted. In regard to the *Soluble Pacific*, would say that we have tested it on corn and buckwheat and find it to be a superior article to many other higher priced fertilizers. We have also seen it tested side by side with Mapes' Special, and the difference could not be distinguished.

Respectfully yours,

W. DONALDSON & SON.

FOR CORN.

We cannot recommend it too highly for this crop,—an application of 200 pounds per acre, on ordinary land, doubling, and sometimes trebling the yield, besides pushing the corn forward to early maturity, and thus causing it to make before the drought sets in.

FOR TOBACCO.

Experience, a hundred times repeated, has proved that this *Guano* pays better than any other known or used.

It causes an early and vigorous growth, which continues even through an ordinary drought, keeping the tobacco green and growing all the time. It ripens the tobacco early and uniformly, curing it on the hill. It makes a beautiful fine silky tobacco, on lands adapted to bright and fancy sorts, which cures perfectly and easily.

FOR PLANT BEDS

it has no equal. It produces fine, healthy, stocky plants, with an abundance of

roots, which do not suffer when transplanted. It produces them early and in abundance. *Plant beds fertilized with it are not troubled by the fly*, and beds which have been nearly destroyed by this pest may be freed from it, and restored by a few applications of this Guano as a top dressing.

FOR GRASS.

Its use as a top dressing on mowing lands has proved it the most valuable fertilizer known, securing a rapid, luxuriant growth, enabling the crop to withstand the disastrous effect of a hot, dry season, strengthening the roots, and securing a heavy aftergrowth for the protection of the roots during the winter. No investment that the farmer can make will repay him so well as its liberal use on his grass lands.

FOR POTATOES

and all root crops its effect is positive and unequaled, bringing on the crop early, greatly increasing the quantity, and improving the quality of the yield.

FOR HOPS, BEANS, MELONS, CABBAGES, ETC.,

it is the best fertilizer ; and for vines of all kinds it is admirable, since it is not only the best fertilizer, but also is an insect destroyer.

FOR FRUIT TREES, GRAPE VINES, ETC.,

it will be found a most valuable fertilizer, *improving the quality, increasing the quantity, and hastening the maturity of the fruit*, oftentimes placing it beyond the reach of early frosts and saving an entire crop.

DIRECTIONS FOR USE.

WHEAT, BARLEY, OATS, ETC.

When put in with a drill, use two hundred pounds per acre ; when sown broadcast, two hundred and fifty to three hundred pounds per acre, harrowed in.

CORN AND POTATOES.

Apply a tablespoonful to a hill, covered and mixed with the earth, before dropping the seed.

TOP DRESSING FOR GRASS.

Sow broadcast from three hundred to five hundred pounds per acre, early in the spring, or it can be sown after mowing in the fall. It is better to apply it just before or after a rain, when the ground is moist.

TOBACCO.

Use from four hundred to six hundred pounds per acre, in the hill, when planting.

BEANS, PEAS, ETC.

Use as for corn and potatoes, if sown in rows, in same proportions, mixing it well with the soil.

HOPS, FRUIT TREES, GRAPE VINES, ETC.

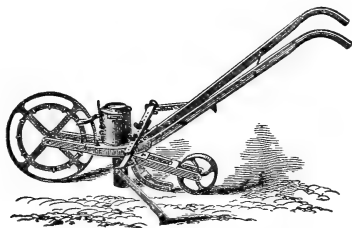

Use the Guano liberally in the spring ; work it about the roots with a fork.

HORTICULTURE.

The peculiar adaptation of SOLUBLE PACIFIC GUANO for the culture of flowers renders it an object of especial interest to horticulturists.

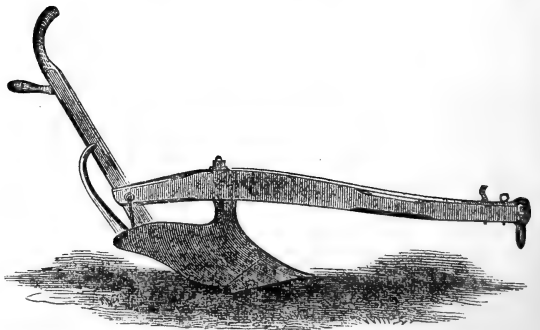

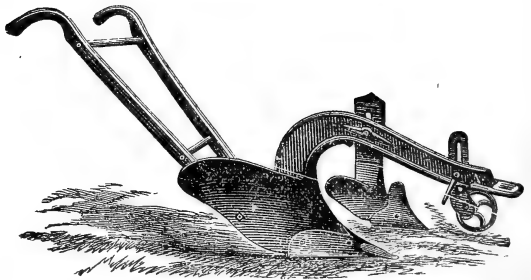

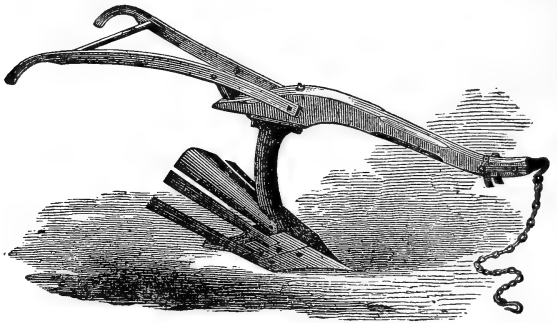

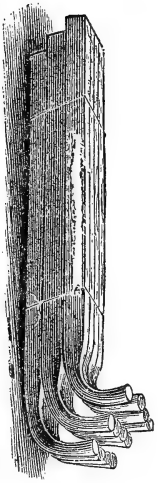

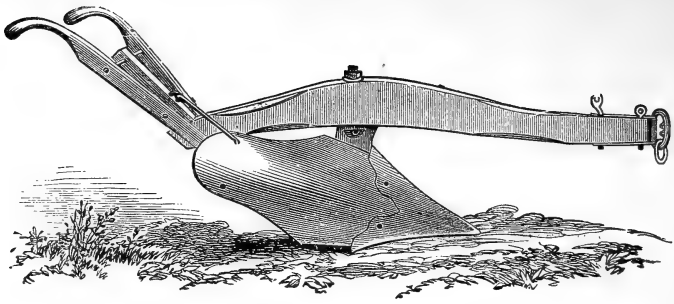

THE STRONG ODOR,

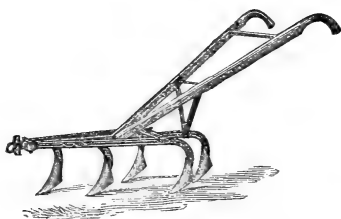

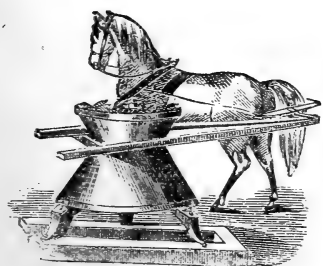

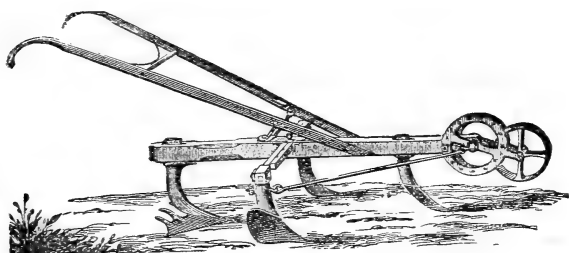

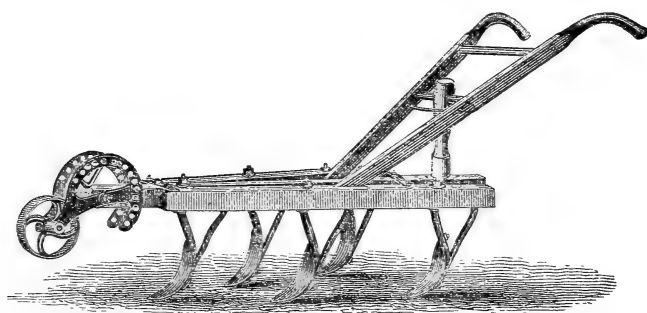

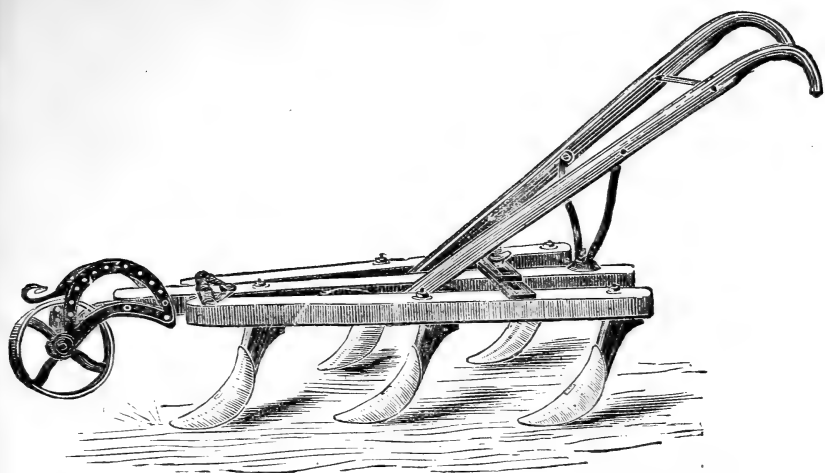

closely resembling and proceeding from the same gases as that of the old-fashioned Peruvian, marks the essential resemblance, and proves the similarity. This odor often creates a prejudice against this Guano, *but no practical tiller of the soil ever thought the better of a manure on account of its loss of odor.*

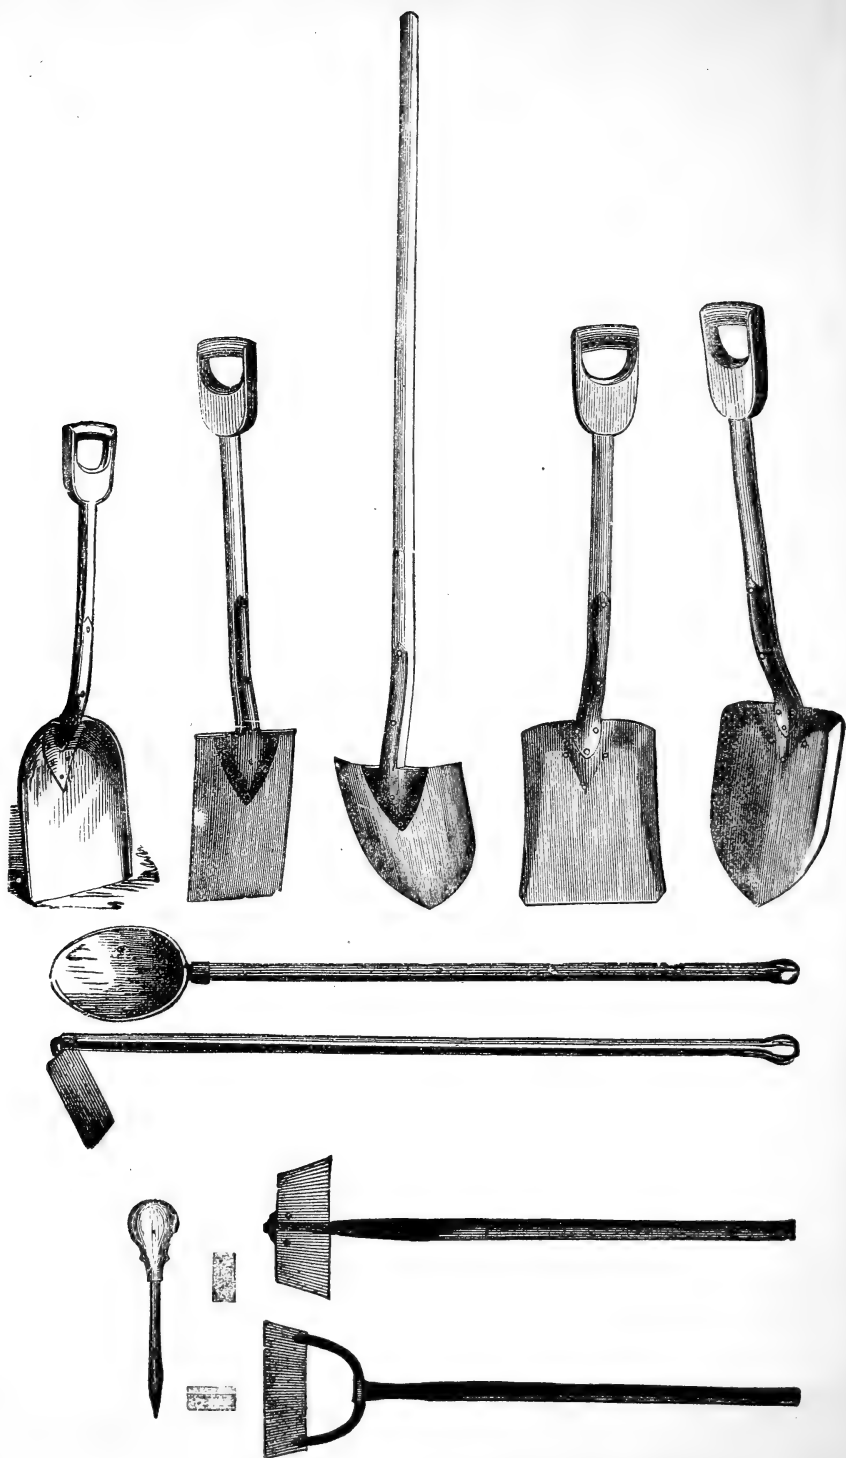

Matthews' Garden Seed Drill.

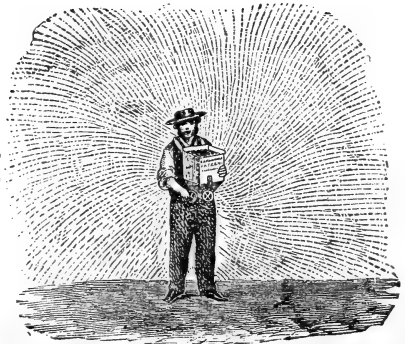

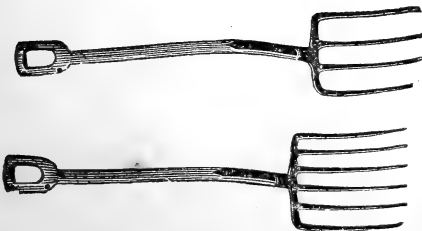

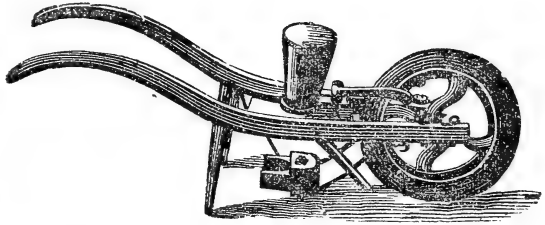

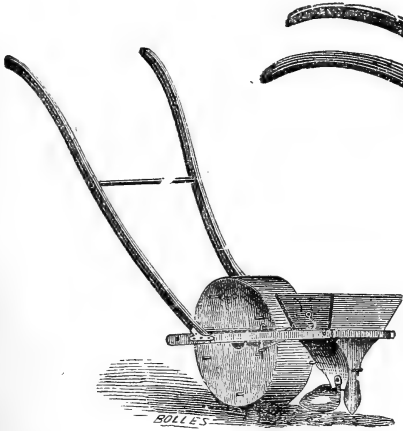

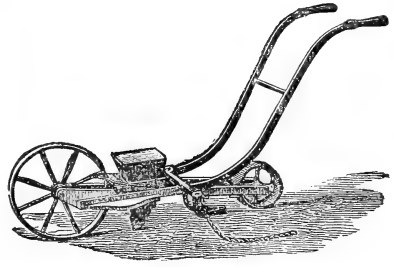

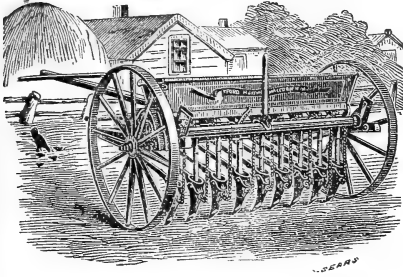

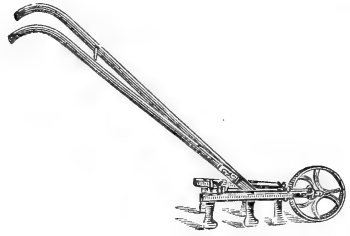

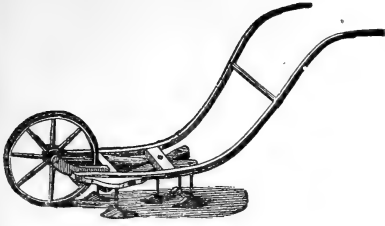

Price, \$13.00. Boxed.

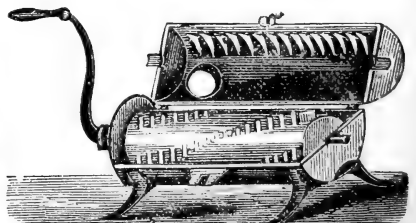

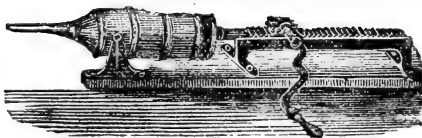

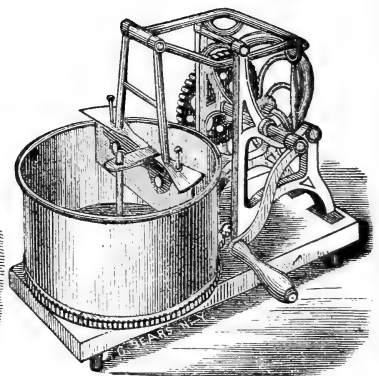

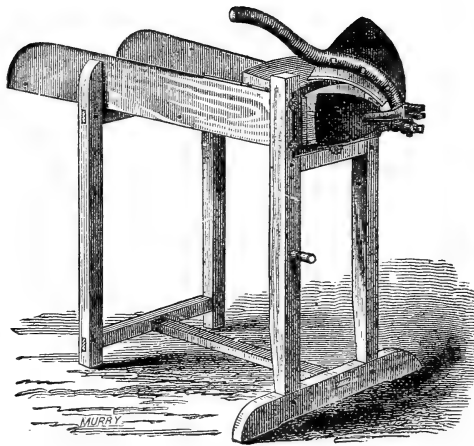

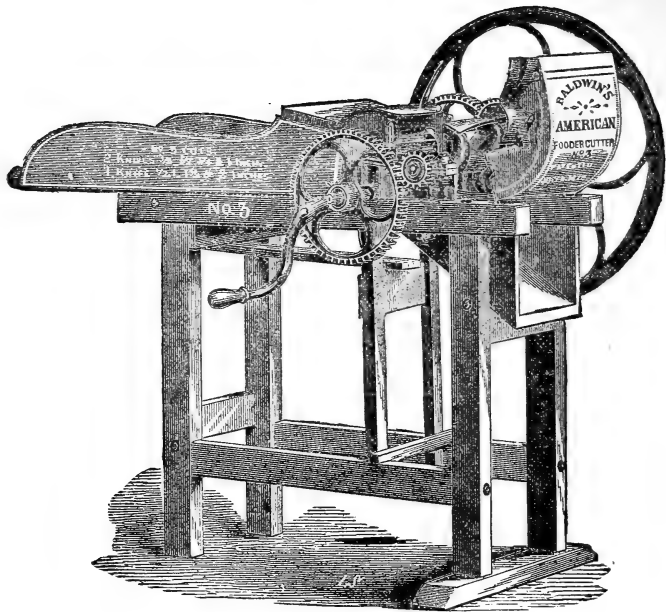

A reliable Seed Drill is recognized as one of the most valuable implements in use. It is a great labor saver, and no one who raises vegetables, whether in large or small quantities, can afford to do without one. But as an unreliable drill is worse than worthless, care should be taken to select the best. We therefore invite your attention to the MATTHEWS' GARDEN SEED DRILL. No better one can be procured.

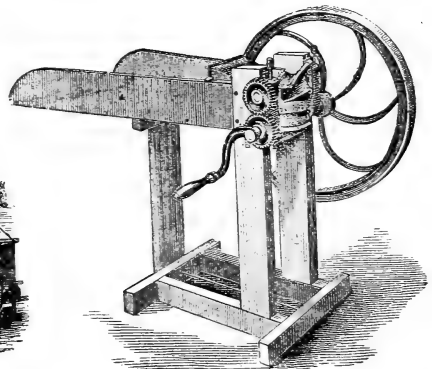

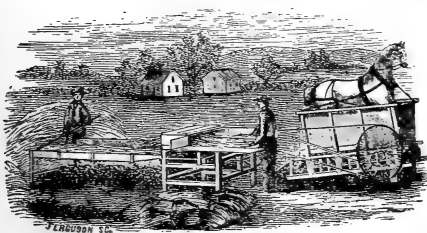

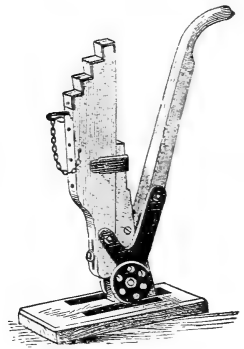

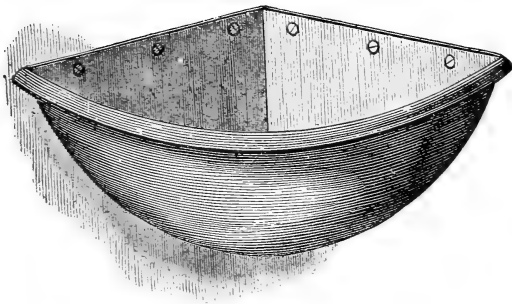

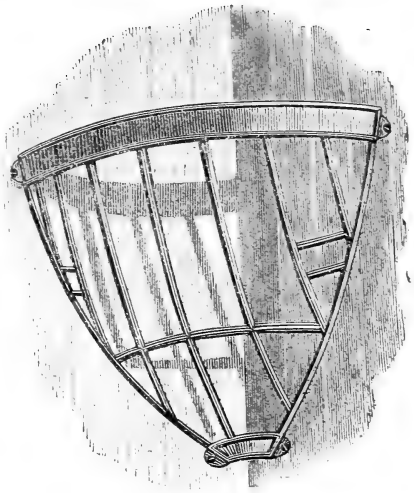

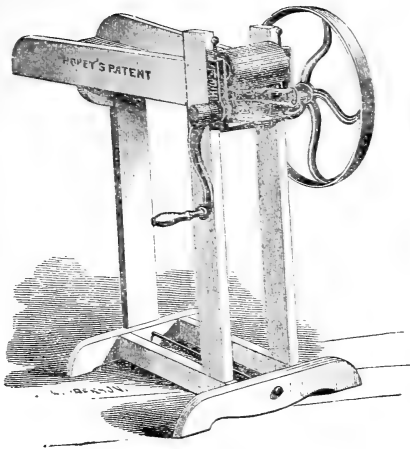

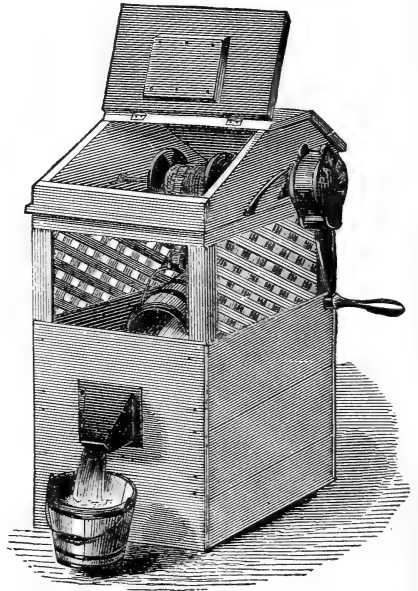

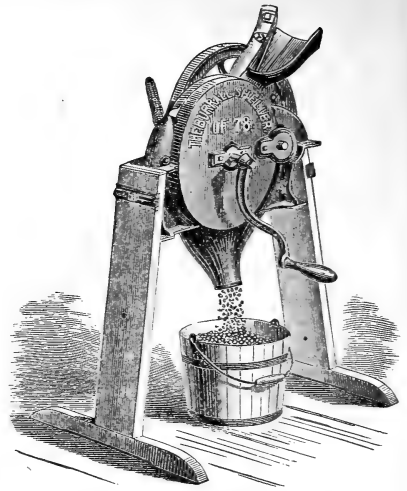

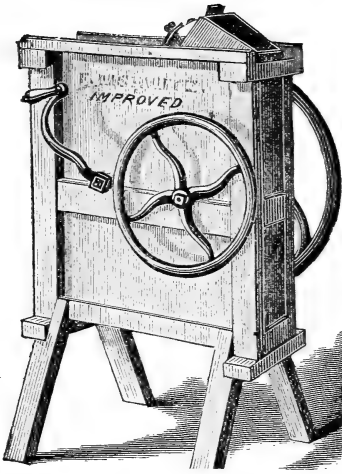

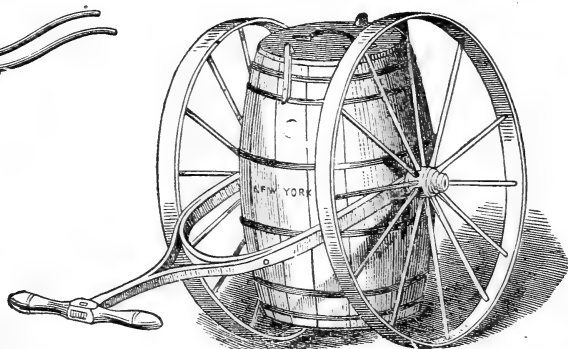

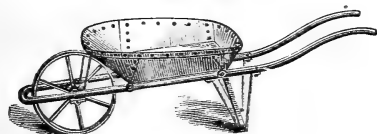

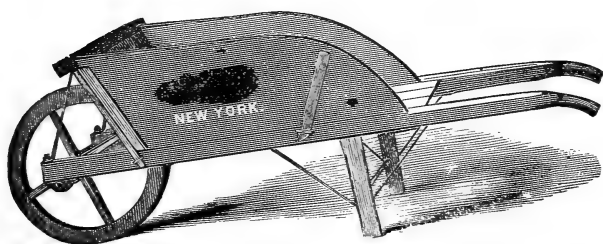

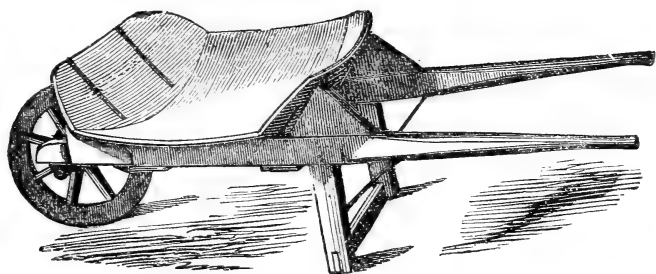

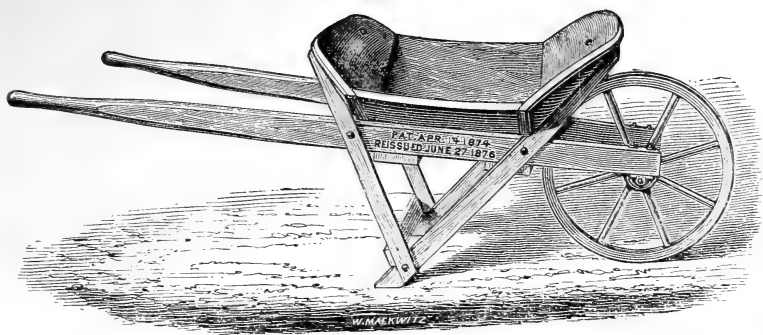

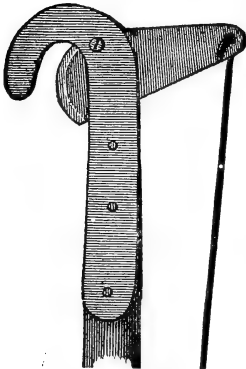

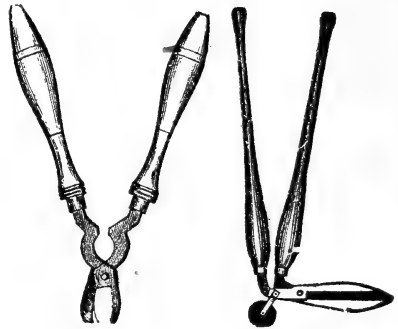

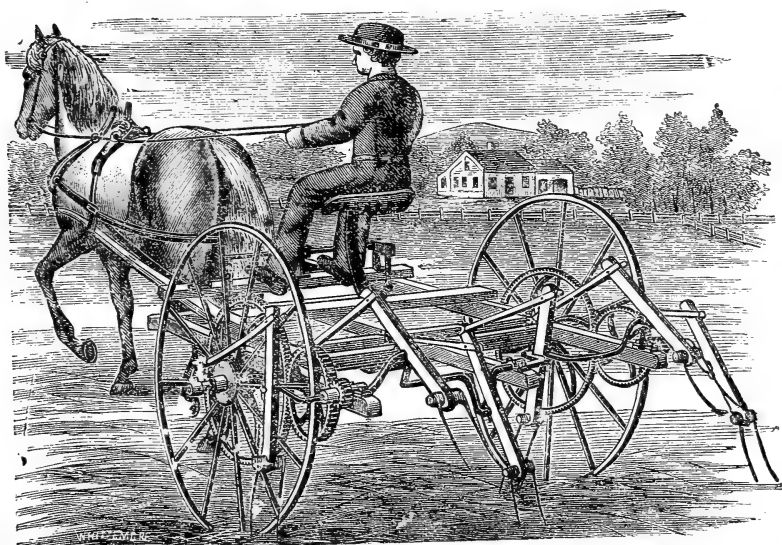

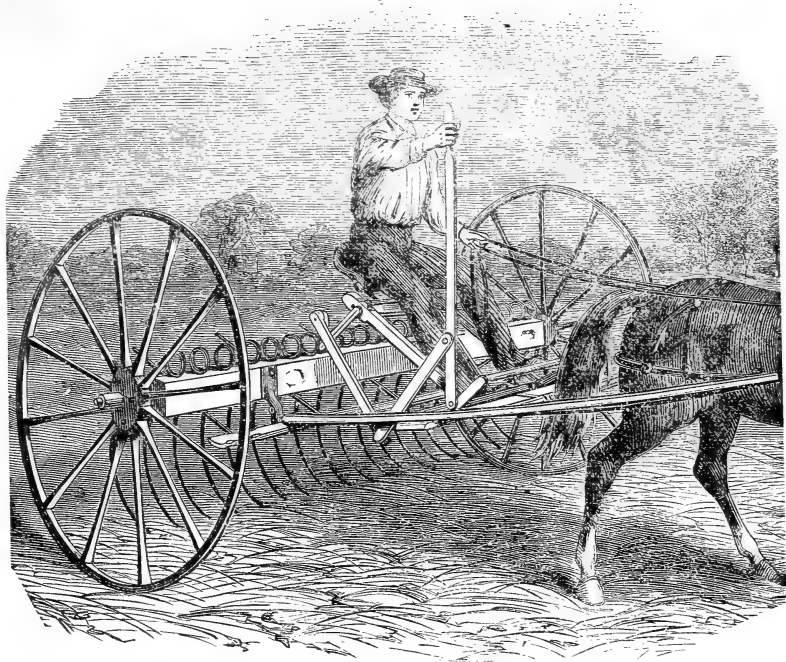

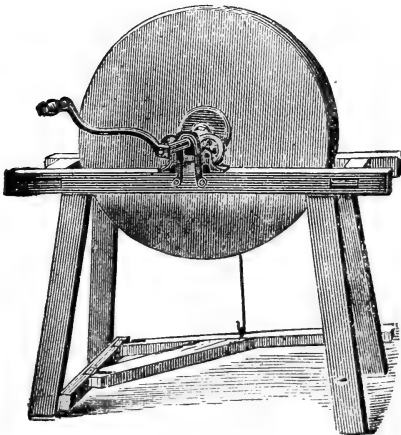

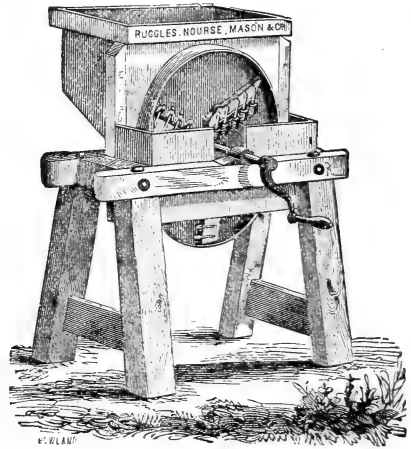

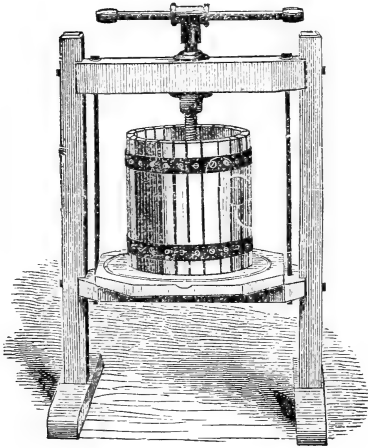

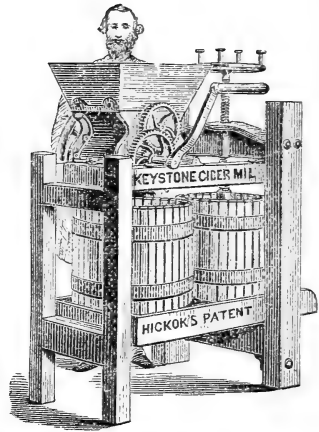

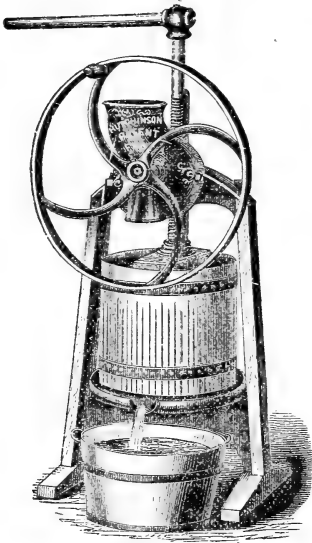

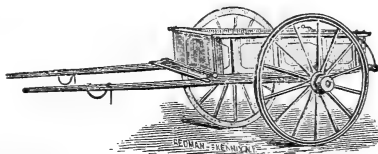

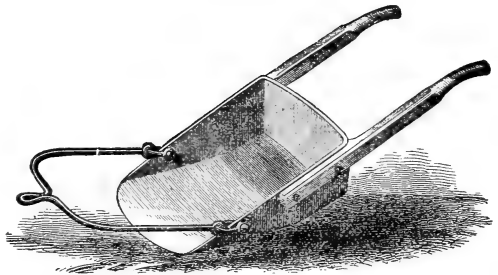

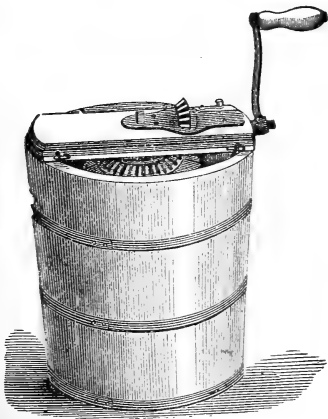

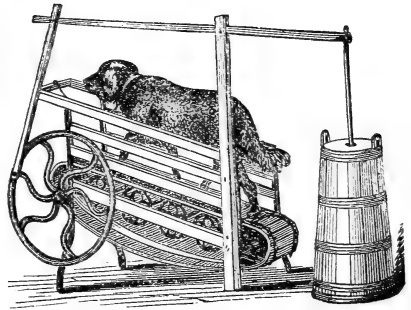

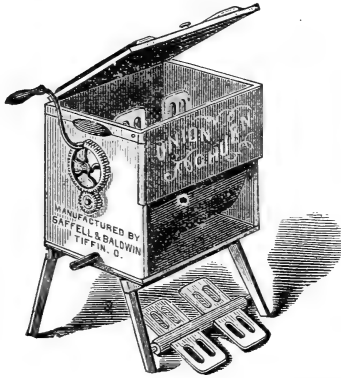

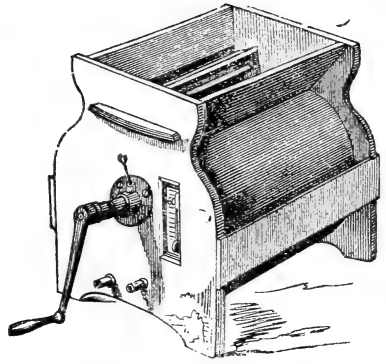

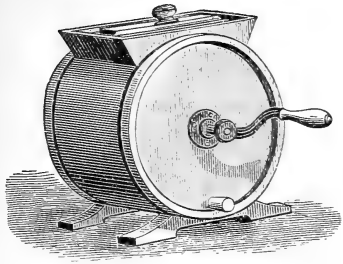

American Improved Syringe, 18 inches long ; diameter, $1\frac{1}{2}$.

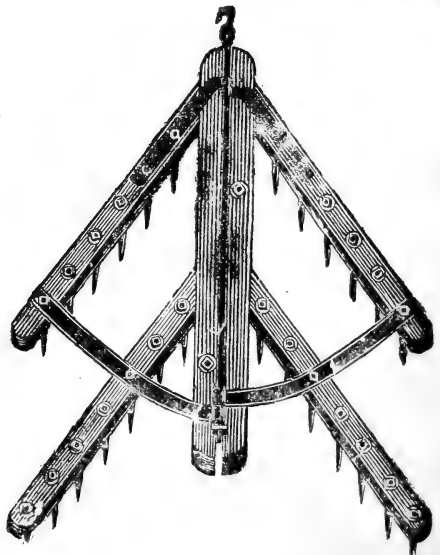

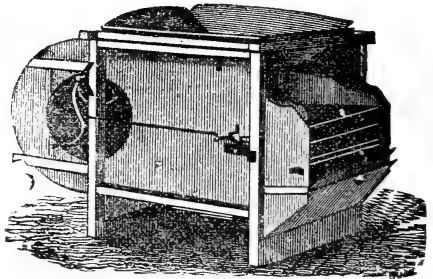

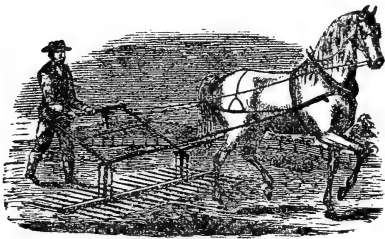

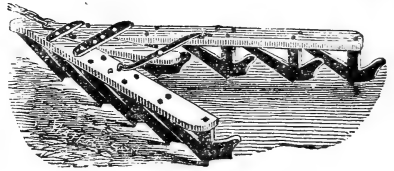

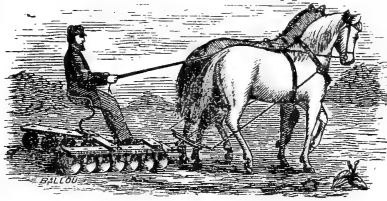

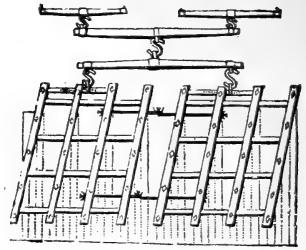

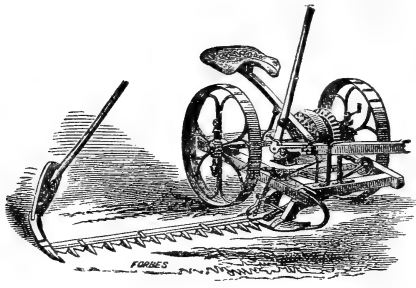

3

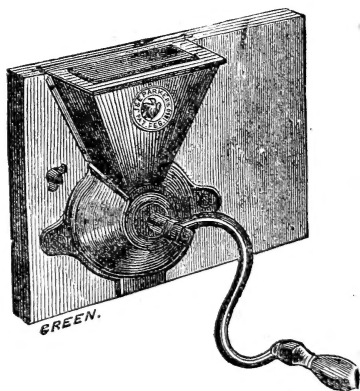

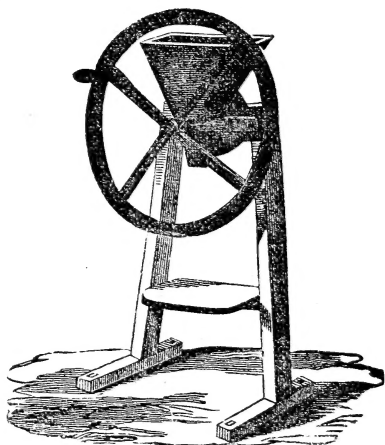

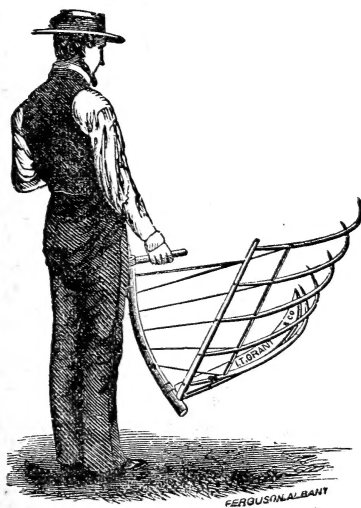

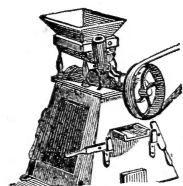

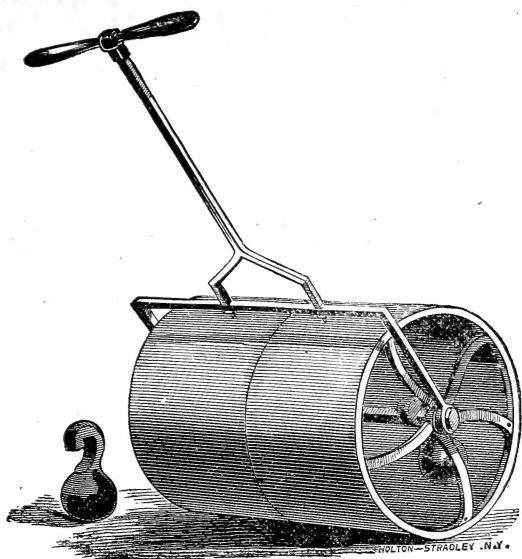

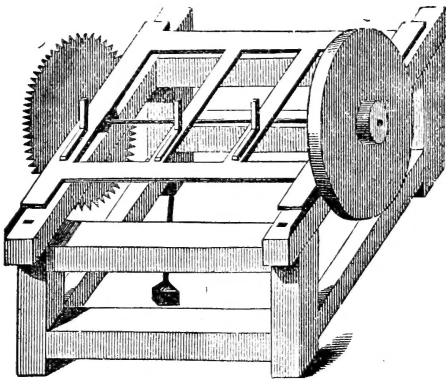

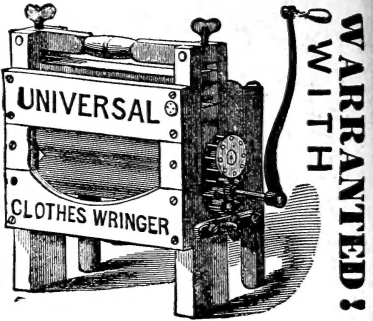

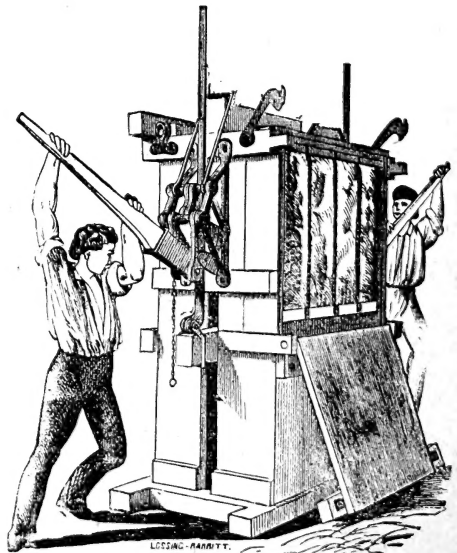

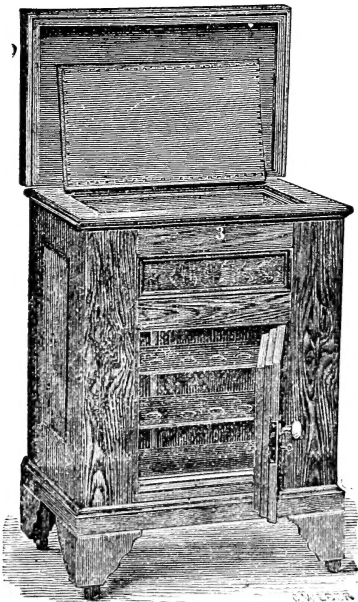

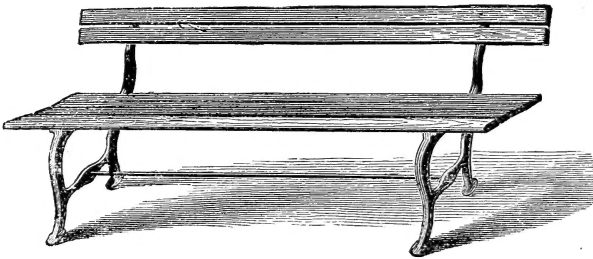

COG WHEELS!

WARRANTED:
WITH

LODGE-BARRY

We have constantly on hand a large and varied assortment of

AGRICULTURAL AND HORTICULTURAL IMPLEMENTS,

all the tools and machines required by

The Planter, Farmer and Gardener,

consisting of Plows of every description, among which will be found the celebrated Minor & Horton Cast Iron Plow, Iron Beam Plows, Steel Plows with Cast Iron or Steel Shares, Subsoil Plows, Side Hill Plows Double Mould Board Plows, Road Plows, &c., Cultivators of every kind, Harrows, Hay and Stalk Cutters, Corn, Coffee, Feed and Fan Mills, Churns, Corn Shellers, Iron and Wood Frame, with and without Separator, Seed and Grain Drills, in great variety, Garden and Field Rollers, Horse Powers and Threshers, Garden, Canal and Coal Barrows, Farm Carts, Wagons and Harness, Field, Lawn and Bush Scythes, Scythe Snaths and Stones, Scythe Rifles, Hay, Manure and Spading Forks, Hoes, Rakes, Shovels, Spades, &c., &c.

Implement Price List Furnished on Application.

FERTILIZERS.

Of these, we keep all of the most improved kinds. We would call especial attention to our

Superior Fine Ground Bone Dust,

Genuine Super-Phosphate of Lime,

Pure Peruvian Guano.

This we procure direct from the Agents of the Peruvian Government.

Poudrette, Land Plaster, Fish Guano,

and all other varieties of Fertilizers, all of which we will furnish at the Lowest Market Prices. We would call particular attention to the celebrated

 **SOLUBLE PACIFIC GUANO,** 

(THE BEST IN USE,)

for which we are Agents. This is a most excellent Manure, and we feel confident will give perfect satisfaction. Special circulars of the above mailed free upon application. See Testimonials, page 14.
